Elementary Poster Winner

Lincoln Adame
McCracken County
Health Department

Middle School Brochure Winner

Amelia Dillion
 Pike County
 Health Department

Parents want to do what is best for their children. They practice the importance of car seats, baby gates, and other ways to keep their children safe. But one of the best ways to protect your children is to make sure they have all of their vaccinations. Here are some benefits of getting your child's regularly scheduled childhood vaccinations:

Childhood Vaccines

- can save your child's life
- are safe and effective
- protect others you care about
- save your family time and money
- protect future generations

*Information from www.hhs.gov

Childhood vaccines save an estimated 2-3 million lives worldwide every year. Vaccinations not only protect your child from deadly diseases, but they also keep other children safe by eliminating or greatly decreasing dangerous and deadly diseases that used to spread from child to child. A vaccine is a dead, weakened version of the germ that causes a disease. When children are exposed to a disease in vaccine form, their immune system, the body's germ-fighting machine, is able to build up antibodies that protect them from contracting the disease if /when they are exposed to it. Vaccines save lives!

DON'T MISS YOUR SHOT!
 Protect your child today!
 Be a **VACCINE CHAMPION!**

*Statistics and info from www.cdc.gov

Scheduled Vaccines protect your children from these 14 diseases:

- Polio
- Tetanus
- Flu
- Hepatitis A
- Hepatitis B
- Rubella
- Hib
- Measles
- Whooping Cough
- Pneumococcal Disease
- Rotavirus
- Mumps
- Chicken Pox
- Diphtheria

Vaccinating children on time, in accordance with the CDC's recommended Vaccination Schedule, protects them AND anyone around them with a weakened immune system!

LOCATIONS VACCINES ARE AVAILABLE:

- Pediatrician
- Local Health Department
- Rural Health Clinic
- Federally Qualified Health Center
- Pharmacy
- Urgent Care Clinic
- School-based Clinic

Parents go to great lengths to protect their children. Give them another layer of protection with

CHILDHOOD VACCINES

Vaccines for Children (VFC) provides FREE vaccines for children who are:

- uninsured
- underinsured
- Medicaid-eligible
- American Indian or Alaskan native
